

WHO ARE WE ?

We are a school based portable dental program. We send a state licensed dentist and dental assistant to setup a dental office inside the school during school hours to see students ages 2-20 that have signed up for dental services.

We offer full comprehensive care: both preventative and restorative services to fully treat the student. We do bill insurances and offer a self-pay option as well as a grant foundation for those that qualify.

We strive to become your child's dental home and to see them every 6 months and for follow up treatments. If there is a procedure we are unable to complete at the school, we will notify the parent and help coordinate with a local dental office to get the treatment taken care of.
